Dear President Joe Biden,

RE: KINDLY ASSIST KENYA'S RAPE VICTIMS ACCESS JUSTICE FROM THE REPUBLIC OF SOUTH KOREA – A HISTORIC AND MOST BEAUTIFUL GESTURE FOR THE PEOPLE OF AFRICA FROM A PRESIDENT OF THE UNITED STATES

Please accept my regards on behalf of DNA TESTING SERVICES and our sister company CRIME SCENE INVESTIGATION (CSI Nairobi), East and Central Africa based investigation firms that have assisted many citizens of the region access justice and closure through Forensic DNA technology.

During Kenya's 2007/8 Post Election Violence (PEV), CSI Nairobi together with our international partners then, Bode Technology Group, made global history by being the first firms to collect, catalogue and store crucial Forensic DNA evidence from about 450 Sexual Assault victims during a time of active unrest.

Great Human Sacrifice

The collection, cataloguing and transportation of this Forensic DNA evidence from an active environment characterized with violence was an effort of great human sacrifice.

Sexual assault victims risked further rape or even death by the mere act of travelling under extremely challenging conditions to hospital for medical attention.

CSI Nairobi staff risked their lives by securely packaging, cataloguing and transporting these samples from Kenya to U.S.A.

Bode Technology incurred heavy transportation costs from Kenya to U.S.A. They further undertook storage and partial analysis and profiling of the collected DNA samples at their cost.

Scientific Evidence, the ICC and Kenyan or Regional Courts

The only scientific evidence pertaining to the 2007/8 Post Election Violence in Kenya that can stand alone and be successfully used by both the International Criminal Court(ICC) and Kenyan or Regional Courts in the prosecution of suspects is available in the form of these Forensic DNA samples collected during that period and the corresponding biodata. The ICC even sent to Kenya a delegation of their Scientific Response Unit to enquire about this evidence.

Kenya 2007/8 PEV – Crucial Forensic DNA Evidence destroyed in South Korea

After the acquisition of Bode Technology by Laboratory corporation in December 2014, we requested our Consultant, Mr.Ed Huffine to locate for us a safe storage facility that could securely store this crucial Forensic evidence as we sort funds for the analysis and profiling of the same.

The securing of these samples outside Kenya was important to safeguard their integrity and protect them from deliberate destruction by suspects.

We were delighted to be informed by our Consultant that he had located a facility in South Korea that would assist us securely store these samples as we sort funds.

The task of seeking funds was then aggressively pursued thereafter.

However when a funding opportunity finally arose in Kenya in the year 2020, we were informed by one of the individuals (Mr. James Lee) who assisted us secure these samples in South Korea that they had been destroyed.

The laboratory in South Korea that had secured these samples is called HUMANPASS Inc. The President and CEO is Eng. Lee, Seung – Jae.

Destruction without Consent

The destruction of these samples was a unilateral decision, undertaken without our knowledge or consent. Further, no such consent was sort from our consultant on this matter.

This act we believe is a crime against Kenya’s victims of sexual assault and a gross violation of their human rights.

Our request to the South Korean government and HumanPass Inc.

Our requests are simple.

- 1.That the South Korea government and HumanPass fully acknowledge that an injustice occurred in South Korean territory against the said rape victims and offer a formal apology, and
- 2.That a compensation of Kshs.25,000,000 or higher be provided to EACH

of the rape victims who are aggrieved by the said parties.

Our request to the South Korean government has been ignored because of suspected racism

All our letters to the government of South Korea have been ignored. This has greatly fascinated us.

Allow me to explain your Excellency.

South Korea literally fought Japan to secure justice and compensation for her victims of WW2 atrocities of Rape committed by the Japanese Imperial Forces.

These South Korean Rape victims also referred to us “Comfort Women” can now move on with their lives having received an apology and financial compensation from the government of Japan.

The surprise is that when it is South Korea’s turn to provide justice and financial compensation to victims of rape whose evidence has been destroyed in South Korea, their pleas fall on deaf ears.

At first, we thought that the reason for the silence from the government of South Korea was because of the Covid pandemic.

Sadly, our suspicions lie squarely on old fashioned racism by South Korea...that Africans are lesser human beings who deserve no justice.

The ICC AND Courts in East Africa have no jurisdiction on this matter

Our effort to have this matter settled in courts at the ICC and East Africa have proven to be an exercise in futility as no court has jurisdiction.

Our tears and cries for justice have therefore brought us to you.

Our request to President Joe Biden; A historic and most beautiful gesture for the people of Africa from a President of the United States.

This company recognizes your global leadership role during these challenging times for humanity.

We are hopeful that you will find space and time to address this crucial matter of Kenya's rape victims who have suffered great injustice in South Korea.

We honestly don't know what you will do with our request. Perhaps you will talk to your friend President Yoon Suk – yeol of South Korea. Perhaps you will guide us in another direction.

Any effort towards securing Kenya's victims of rape justice and compensation from South Korea will be most welcomed.

And your intervention in this matter will make African history.

America and President Clinton had a chance to save the people of Rwanda during the Rwandan Genocide and failed. With this current matter, America has another chance to intervene on behalf of an African state.

This action by an American President, by President Joe Biden will stand out as one of America's most beautiful gestures for the people of Africa. For the first time in African history, an American President would have directly intervened and assisted living and breathing victims of mass gender violence secure justice.

The strongly held perception in Africa that the United States views African countries as "shithole countries" as declared by President Trump will be greatly changed for the better by your intervention in this matter.

Together with the Kenyan victims of rape, we eagerly await your guidance.

Thank you.

Yours Sincerely,

Kinyanjui Murigi,
DIRECTOR & HEAD OF HUMANITARIAN SERVICES
